RESIDENTIAL SERVICES

Ready to secure your home?

We are here to help you make solid decisions on how to best protect your home and loved ones without breaking the budget.

We want to ensure that you and your loved ones have Peace of mind!

We understand that there are many options available and it is hard to choose a reliable service provider that you can easily communicate with.

In order to delineate the best security, it is essential for us to understand the items noted on the table below.

ID	Task	Notes
02	Crime Statistics	The goal is to identify the types of crimes commonly affecting the area where the residence is located and how frequently these crimes occur.
03	Security Lighting Analysis	The goal is to determine the most effective placement of light fixtures to deter crime, enhance visibility, and improve the perception of safety.
06	Neighborhood and Space Analysis	The objective is to evaluate current and/or planned perimeter protection measures to define a clear boundary around the property, deter unauthorized access, and offer a visual

		deterrent to potential intruders. This will help slow down entry attempts and enable controlled access through gates or designated entry points.
07	Building Design Physical Security Analysis	The goal is to assess the building's architectural design to identify potential vulnerabilities and weaknesses, helping to clarify factors that could either support or hinder security measures. It also aims to identify any challenges that may arise during the installation of security systems.

The above will allow us to delineate a proper Building Security Analysis in order to provide the best Security Solution addressing the risks identified.
